Application type
Pre-Application

Proposal
Potential residential development at land opposite Carpenders Avenue. Appraisal of potential access options

Background
Thank you for the pre-application enquiry requesting an initial view on a possible junction onto the A4008 (Oxhey Lane) in order to provide access to 200-250 residential properties and an extension to an extant care home. Two options have been put forward. Your pre-application enquiry seeks an initial view on a preferred option prior to any modelling or safety audit being carried out.

Policy Context - LPA
The site is shown as Metropolitan Green Belt in its Planning Policies map. You state that “the site was included in the draft Local Plan (Part 2: Sites for Potential Allocation) in 2021 as site ref CFS69a. There is also a draft site allocation for a secondary school as CFS11 directly north of the site in question”. The results of the latest Three Rivers Local Plan consultation removed the site for residential due to the potential for very high harm to the Green Belt.

Site Ref.	CFS69a	Site	Land at Carpenders Park Farm	Size (ha)	22.5
			Current use	Agricultural	
			Dwelling Capacity	485	
			Phasing	6-15 years	
			Green Belt	Yes. Assessed as very high harm if released	
Reason for removal: Rejected as falls into area of very high Green Belt harm.					

Subsequent to the new NPPF (December 2024), Three Rivers District Council is now searching for previously developed land (brownfield sites), urban areas, or greenfield sites that could be included in its new Local Plan and has decided to defer its submission of its plan to the government.

Site CFS11 for potential education development is shown below. Three Rivers District Council consider this site to be suitable and deliverable for a school site subject to revision of the green belt boundary.

Site Ref.	CFS11	Site	Carpenders Park Farm Oxhey Lane	Size (ha):	8.2
				Current Use	Agricultural
				Proposed Use	Secondary education
				Green Belt	Yes. If allocated, the Green Belt boundary would have to be revised to remove land for school buildings. Land for ancillary playing fields would remain in the Green Belt.
				Phasing	1-10 years

Policy context - HCC Highways
The most relevant HCC transport policy in relation to the present enquiry is policy 5(f) of HCC's Local Transport Plan 2018. This states that HCC as HA will "Only consider new accesses onto primary and main distributor roads where special circumstances can be demonstrated in favour of the proposals". In this respect the proposal was considered by HCC's Strategic Transport Infrastructure Board (STIB) on 5 March 2025.

The view of STIB was that on the basis that this site does not have Local Plan designation it should not be deemed to have special circumstances at the current time. The highway authority would therefore likely object to any future application citing policy 5(f) of HCC's Local Transport Plan, 2018, in the absence of a Local Plan designation for the proposed use.

Technical assessment
As noted above HCC as highway authority would not support an access onto Oxhey Lane for a residential development on this site as it is considered contrary to policy 5(f) of HCC's Local Transport Plan, 2018. Also, as noted, this view may change should the site have Local Plan designation. In order to aid possible future considerations, the following commentary is provided.

For a future application the Highway Authority would expect that a Transport Assessment (TA) and Draft Residential Travel Plan (RTP) would accompany a future planning application in order to allow the highways and transport impacts of the development to be considered. It is recommended that a scope for the TA is agreed with the highway authority prior to its preparation as part of its pre-application process.

The Transport Assessment will need to reflect latest guidance and current policy - in particular HCC's Local Transport Plan (LTP) 4 (May 2018).

LTP 4 Policy 1 (Transport User Hierarchy) considers that "To support the creation of built environments that encourage greater and safer use of sustainable transport modes, the county council will in the design of any scheme and development of any transport strategy consider in the following order:

• Opportunities to reduce travel demand and the need to travel
• Vulnerable road user needs (such as pedestrians and cyclists)
• Passenger transport user needs
• Powered two-wheeler (mopeds and motorbikes) user needs
• Other motor vehicle user needs."

LTP 4 Policy 5 (Development Management) states that 'The county council will to work with development promoters and the district and borough councils to:
a) Ensure the location and design of proposals reflect the LTP Transport User Hierarchy and encourage movement by sustainable transport modes and reduced travel demand.
b) Ensure access arrangements are safe, suitable for all people, built to an adequate standard and adhere to the county council's Highway Design Standards.
c) Consider the adoption of access roads and internal road layouts where they comply with the appropriate adoption requirements and will offer demonstrable utility to the wider public. Where internal roads are not adopted the county council will expect suitable private management arrangements to be in place.
d) Secure developer mitigation measures to limit the impacts of development on the transport network, and resist development where the residual cumulative impact of development is considered to be severe.

e) Require a travel plan for developments according to the requirements of 'Hertfordshire's Travel Plan Guidance'.
f) Only consider new accesses onto primary and main distributor roads where special circumstances can be demonstrated in favour of the proposals.
g) Resist development that would either severely affect the rural or residential character of a road or other right of way, or which would severely affect safety on rural roads, local roads and rights of way especially for vulnerable road users.
h) Ensure new developments provide facilities for charging plug-in and other Ultra Low Emission vehicles, as well as shared mobility solutions such as car clubs.

In respect to the TA, the applicant will also need to address the guidance within HCC's Place & Movement Planning and Design Guidance. This document was formally adopted by HCC in 2024 as a supporting document for its Local Transport Plan 2018.

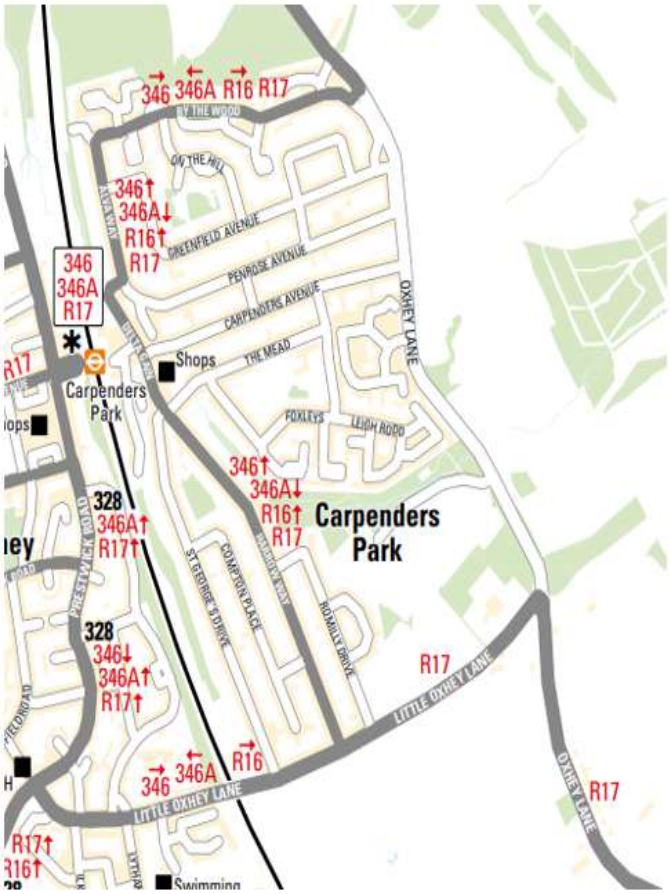
Site
Oxhey Lane (A4008) is considered to be a P2/M2 road under P&MPDG. It is categorised as a Main Distributor road. It has street lighting and a 40mph speed limit. 85th percentile speed measurements are indicated as under 40mph. A public right of way – footpath Bushey 025 – starts opposite Carpenders Avenue in Oxhey Lane and provides a link to Merry Hill. Casualty records indicate one incident involving serious injury at the junction of Oxhey Lane with Carpenders Avenue in the most recent data for a five year period.

The site is about 1km from Carpenders Park railway station which has shops including a supermarket and pharmacy in its vicinity. Buses currently route via Carpenders Park railway station as indicated below.



A future TA would need to report in detail on the location of local facilities and public transport in order to establish whether the site can be considered sustainable in transport terms.

Carpenders Avenue which links the site to the railway station is identified as a Key Walking Route in the LCWIP for this area. Package 8 of SW Herts Growth and Transport Plan (GTP) includes measures to enhance the attractiveness of journeys by bike and bus in areas to the south of Watford. Measures outlined in the LCWIP and GTP will need to be examined in a TA with a view to considering any necessary planning obligation in this respect.

Options
Two options are put forward for consideration by HCC as highway authority:

Option 1. An access directly opposite Carpenders Avenue with signalisation for both vehicles and pedestrians, (the developer's preferred option) or,

Option 2. A priority junction about 25 metres south of Carpenders Avenue.

For option 1 you identify an issue with inter-visibility on the north-west side of the proposed junction, albeit noting that Manual for Streets advises flexibility on visibility requirements. You also point out an uphill gradient for traffic approaching Oxhey Lane from Carpenders Avenue suggesting potentially lower speeds approaching the junction. For option 2 you note that the distance of the proposed junction to the junction with Carpenders Avenue is below the recommended spacing in P&MPDG.

Any proposal taken forward will need to be subject to traffic modelling and the road safety audit process. In advance of this, the following considerations are put forward.

HCC's Countryside Rights of Way team (CROW) and our tree officer have been consulted on the proposals.

Our tree officer notes concerns regarding the mature Oak seen here:

https://www.google.co.uk/maps/@51.6302166,-0.3737461,3a,90y,57.56h,114.02t/data=!3m7!1e1!3m5!1sccasNB6G5RONH3FwgfAQ9w!2e0!6shttps:%2F%2Fstreetviewpixels-pa.googleapis.com%2Fv1%2Fthumbnail%3Fcb_client%3Dmaps_sv.tactile%26w%3D900%26h%3D600%26pitch%3D-24.019999999999996%26panoid%3DccasNB6G5RONH3FwgfAQ9w%26yaw%3D57.56!7i16384!8i8192?entry=ttu&g_ep=EgoyMDI1MDMwOC4wIKXMDSoASAFQAw%3D%3D

It is not yet established whether this is on the highway, on private land or overlapping both areas. Of relevance to highway trees a link to HCC's "Tree strategy and guidance" can be located on the following web page:
https://www.hertfordshire.gov.uk/services/highways-roads-and-pavements/report-a-problem/grass-cutting-hedges-trees-and-weeds.aspx#DynamicJumpMenuManager_2_Anchor_3

The Rights of Way team notes that they would seek to retain the route free from any shared use with estate footways or carriage way to minimise any risk to vulnerable non-motorised path users from the private motorised users accessing the estate. A separation that would both protect vulnerable users from conflict and retain the rural character of the path would be welcomed.

HCC's Rights of Way Improvement Plan (ROWIP) suggestion list identifies a desire - expressed by our consultees and the public - to cycle this route (identified as path 8/240). Whilst improved cycle links would be welcomed, the rights of way team would require more information on the proposed design in order to make a considered response. The restricted width at the Merry Hill end of the footpath is noted as an issue in this respect.

It is not expected that a definitive view on options could be provided ahead of detailed design, modelling and safety auditing. HCC highway's initial view would be a preference for option one as this would provide formal pedestrian crossing facilities. As noted above, the spacing related to the priority junction in option 2 is in conflict with HCC's P&MPDG guidance.

The applicant's Access Options Appraisal identifies issues with the inter-visibility zone required by CD123. This might best be tested via the road safety audit process. It is suggested that moving the crossing to the south side of the junction might be usefully explored in this respect.

Visibility splays for P2/M2 Main Distributor roads are not provided within P&MPDG as direct accesses onto these types of roads are not envisaged. Reference should be made to CD123. It is considered that a junction onto Oxhey Lane at this location would be regarded under "all other priority junctions" not a "simple priority junction" as defined by CD123.

Meeting
Your pre-application enquiry indicated a wish to meet to discuss this matter further. Please do contact me to arrange this.

Conclusion
It is necessary for me to conclude that, with observing that in accordance with HCC's Highways DM Protocol for pre-application advice any advice given by County Council officers for transport pre-application enquiries does not constitute a formal response or decision of the Council with regards to future planning consents. Any views or opinions expressed are given in good faith, and to the best of ability, without prejudice to the formal consideration of any planning application, which will be subject to public consultation and ultimately decided by the Local Planning Authority. The County Council cannot guarantee that new issues will not be raised following submission of a planning application and consultation upon it. It should be noted that the weight given to pre-application advice will decline over time.

Graham Burrell

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

*To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: COUNT/TRP*FACT. Trip rates are then rounded to 3 decimal places.*

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

*To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: COUNT/TRP*FACT. Trip rates are then rounded to 3 decimal places.*

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

*To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: COUNT/TRP*FACT. Trip rates are then rounded to 3 decimal places.*

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

*To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: COUNT/TRP*FACT. Trip rates are then rounded to 3 decimal places.*

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

*To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: COUNT/TRP*FACT. Trip rates are then rounded to 3 decimal places.*

The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: COUNT/TRP*FACT. Trip rates are then rounded to 3 decimal places.*

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

*To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT).
