Dear Claire,

Re: Outline Application: Development of up to 600 residential dwellings (Use Class C3(a)), construction of a 5-bedroom property for childrens social care and supported living (Use Class C3(b)). Two vehicular access points from Little Green Lane and further pedestrian / cycleway accesses. A one form entry primary school (Use Class F1(a)) (plus expansion land for a two form entry primary school). A mixed use local centre including provision for NHS health and social care services (Use Class E(e)), community building (Use Class F2), retail and cafe provision (Use Class E(a-c)), car parking and associated infrastructure. A country park, areas for play and recreation, allotments, community orchard and landscaping with associated infrastructure including sustainable urban drainage systems. (Layout, scale, appearance and landscape as reserved matters).- Land To North Of Little Green Lane Croxley Green WD3 3SP

ARCHAEOLOGICAL IMPLICATIONS

Thank you for consulting me on the above application.

No heritage assets of archaeological interest are known from within the proposed development site. However, as noted in the Heritage Assessment report submitted with the planning application, there is an underlying potential for prehistoric activity, which would be of regional significance. The site has not been subject to significant development or other disturbance, and according to the same Heritage Assessment, cartographic evidence shows the development site has remained largely untouched since at least 1766. As a result, it is likely that if any archaeological remains are present on the remainder of the site, they are well preserved.

A Geophysical Survey carried out in September of 2024 revealed a number of anomalies within the site. Although none of these anomalies could be confidently identified as archaeological in origin, there were anomalies where archaeological origin could not be ruled out either. In particular, a group of anomalies were identified in Area 2, which form rectangular patters that may relate to buildings or other structures. Given that maps from

the post-medieval period show no indication of buildings within the site, these anomalies could potentially date to the a much earlier period, if found to be archaeological in nature.

Therefore, I believe that given the size and scope of the proposed development, it should be regarded as having the potential to have an impact on heritage assets of archaeological interest, and I recommend that the following provisions be made, should you be minded to grant consent:

1. the archaeological field evaluation of the proposed development area, via trial trenching, prior to development commencing;
2. such appropriate mitigation measures indicated as necessary by that evaluation. These may include:
 - a. the preservation of any remains *in situ*, if warranted,
 - b. appropriate archaeological excavation of any remains before any development commences on the site, with provisions for subsequent analysis and publication of results,
 - c. archaeological monitoring of the groundworks of the development (also including a contingency for the preservation or further investigation of any remains then encountered),
 - d. such other provisions as may be necessary to protect the archaeological interests of the site;
3. the analysis of the results of the archaeological work with provision for the subsequent production of a report and an archive, and the publication of the results;
4. such other provisions as may be necessary to protect the archaeological interests of the site;

I believe that these recommendations are both reasonable and necessary to provide properly for the likely archaeological implications of this development proposal. I further believe that these recommendations closely follow the policies included within Policy 16 (para. 218, etc.) of the National Planning Policy Framework, and relevant guidance contained in the National Planning Practice Guidance, and in the Historic Environment Good Practice Advice in Planning Note 2: Managing Significance in Decision-Taking in the Historic Environment (Historic England, 2015).

In this case three appropriately worded conditions on any planning consent would be sufficient to provide for the level of investigation that this proposal warrants. I suggest the following wording:

A No demolition/development shall take place/commence until an Archaeological Written Scheme of Investigation has been submitted to and approved by the local planning authority in writing. The scheme shall include an assessment of archaeological significance and research questions; and:

1. *The programme and methodology of site investigation and recording*
2. *The programme and methodology of site investigation and recording as required by the evaluation*
3. *The programme for post investigation assessment*
4. *Provision to be made for analysis of the site investigation and recording*
5. *Provision to be made for publication and dissemination of the analysis and records of the site investigation*

6. *Provision to be made for archive deposition of the analysis and records of the site investigation*
7. *Nomination of a competent person or persons/organisation to undertake the works set out within the Archaeological Written Scheme of Investigation.*

B *The demolition/development shall take place/commence in accordance with the programme of archaeological works set out in the Written Scheme of Investigation approved under condition (A)*

C *The development shall not be occupied/used until the site investigation and post investigation assessment has been completed in accordance with the programme set out in the Written Scheme of Investigation approved under condition (A) and the provision made for analysis and publication where appropriate.*

If planning consent is granted, I will be able to provide detailed advice concerning the requirements for the investigations, and to provide information on professionally accredited archaeological contractors who may be able to carry out the necessary work.

I hope that you will be able to accommodate the above recommendations.

Please do not hesitate to contact me should you require any further information or clarification.

Yours sincerely,

Peri Horsley
